

Smile Brighter: Beverly Hills Smile Make-Over Specialist Dr. Kevin Sands Talks About Smile Trends

By admin
Your smile says a great deal about who you are, how you feel, and most importantly how you feel about yourself. If you are not grinning ear to ear about how your smile looks, Beverly Hills smile make-over specialist Dr. Kevin Sands can help.

What would you say is the most popular medical or cosmetic procedure being requested at your office right now?

The addition of Porcelain veneers has quickly become our most requested service. As everyone wants to look their best, we have created custom porcelain veneers for literally thousands of patients from all walks of life, allowing anyone to take years off their appearance, look their best, and have that perfect red carpet smile.

What does this procedure entail, and what issues does it address?

Creating and installing veneers is typically a two appointment process. The Initial appointment includes a meet with my porcelain artisan who reviews color, shape, takes and all details which will need to be addressed for the custom smile make-over. I then lightly prepare the teeth by removing some enamel, and installing temporary veneers. One week later, once the custom veneers have been hand created by the artisan, they are fit to the patient and bonded in permanently.

Why do you think this has become a trend?

Everyone wants the perfect smile, and with increasing concern about image in society, more and more your smile is your best accessory. Additionally, materials have become better and better and this changing technology has helped make veneers look so natural that no one knows they have been done.

To whom would you recommend this procedure? Who would be the ideal candidate?

I would recommend this to anyone of any age, from all walks of life. The fact that this procedure can overcome crooked, chipped or discolored teeth while being less invasive than other techniques makes it an ideal option.

What benefits do patients report after having this done?

Patients have immediately noticed how much younger they look. They report feeling smiling much more often, both because they are happy, and because they now are much more confident in their smile's appearance.
