LATEST VIDEOS

**What should your clients expect if they come to you for a consultation?**

Clients should expect a full facial analysis, a meeting with our esteemed in-house ceramist to discuss color and shape, and an in-depth discussion about the smile makeover process. We take thousands of before and after pictures so our patients can get a true idea of what their smile will look like after the procedure.

**What do you see as your practice's greatest success in 2012? How will you push past this in the coming year?**

Today, I'm happy that my practice keeps growing at a rapid pace. I love making people happy, and my goal is to continue to do just that. A smile is a great confidence builder.

I'd say that my biggest success of 2012 was getting my kid into a private kindergarten!

**What do you consider your ultimate specialty and what about this sets you apart from the rest of the field?**

I'm a true smile makeover specialist—I do custom work, as no two smiles are ever the same. At my office, we create the Ferrari of veneers.
